SAFE WORK METHOD STATEMENT

BNP SWMS 06 - Reheat Works V2

Issued 15-May-23

ABN: 69 056 378 575			11 Huntington Place, Banyo QLD 4014	PH: (07) 3630 2500	
Specific Training	General industry induction (QLD white card); Site specific induction, trained in SWMS / SDS procedures, StreetPrint Approve Applicator, Trained in Safe & Proper Use of PPE				
Personal Protective Equipment	Safe	ety glasses, gloves when Manua	nes – Hi-Vis Long Sleeve shirt – (Sleeves rolled down) or Hi-Vis al Handling, Safety helmet where required. , Respirators, Knee high leather chaps	s vest over shirt, Long pants,	

Implement, Monito	or and Review
Actions before work commences	Workers will be inducted onto the Safe Work Method Statement Traffic management controls, approved plans and permits must be in place before working within 6mtrs of live traffic. All traffic controllers must hold the relevant qualification for the role. Evidence must be sighted prior to start of works. Works must be planned and structured to cause minimum disruption to local traffic, pedestrians and residents. Conduct pre-operational checks on mobile plant
Actions during works	Signage checks must be completed at regular intervals and documented throughout the day. Works will be monitored to ensure works are carried out in accordance with the Safe Work Method Statement Report any hazards or incidents. Person in control of the works is the nominated person who will ensure the implementation of this SWMS. All incidents and / or near misses must be reported following the Brick N Pave incident reporting process.
Actions after work is completed	Safe Work Method Statement will be reviewed and amended when changes are made or where a new hazard has been identified, or at least annually

Risk Assessment

	HEALTH & SAFETY CONSEQUENCES	1. INSIGNIFICANT - no injuries	MINOR first aid treatment, spillage contained on site	3. MODERATE - medical treatment, spillage contained with outside help	4. MAJOR - extensive injuries, loss of production	5. CATASTROPHIC - death, toxic release of chemicals	HIGHEST Level 1 Eliminate the hazards O
>	A. Common or Frequent Occurrence	M5	M10	H15	E20	E25	Level 2 Substitute the hazard with something safer Isolate the hazard from people
늘	B. Is known to Occur or 'It Has Happened"	L4	M8	H12	E16	E20	Reduce the risks through engineering
BAB	C. Could Occur or "I've Heard of it Happening"	L3	M6	M9	H12	H15	reliability of
ROE	D. Not Likely to Occur	L2	L4	M6	M8	M10	Level 3 Reduce exposure to the hazard using administrative actions
_	E. Practically Impossible	L1	L2	L3	L4	M5	LOWEST Use personal protective equipment LEAST

Item	Job sequence	Potential Hazards	Risk	Risk L x C = R	Control Measures	Residual Risk L x C = R	Responsible Person
1.	Site Establishment of works on, in or adjacent to a road or traffic corridor in use by traffic other than pedestrians	Public	Incident due to proximity to adjacent road	B x 5 = E20	BNP to hire a licensed Traffic Management Company to develop and establish appropriate traffic management controls taking in consideration sequencing, job specific Temporary Road Closure Approval requirements and scheduling of works.	D x 5 = M10	BNP representative Traffic Management Company
					Ensure permits are current.		
					Traffic Management Plan and Traffic Guidance Schemes to be developed and implemented by a licenced traffic management company.		
					Ensure traffic management controls are inspected and signed off by traffic management company.		
					Site vehicles to have warning devices (e.g. flashing lights, vehicle signage, etc.).		
					Workers to wear high visibility clothing (night vis as required).		
2.	Starting Work	Poor consultation	Incident due to poor	B x 5 = E20	BNP to coordinate consultation between site personnel and traffic control company.	D x 5 = M10	BNP representative
			consultation		Consultation to include		
					 Scheduling of works Movement of plant and vehicles Nominated UHF channel Specific hazards and controls relevant to the shift Emergency response 		
3.	Unloading plant	Falls	Injury due to fall	B x 4 = E16	Ensure fall protection is in place on truck. Utilise ladder access to rear of truck.	D x 4 = M8	BNP representative

Item	Job sequence	Potential Hazards	Risk	Risk L x C = R	Control Measures	Residual Risk L x C = R	Responsible Person
4.		Manual Tasks	Sprains and strains	B x 3 = H12	Use mechanical assistance to lift heavy plant for truck.	D x 3 = M6	BNP representative
					Ensure personnel understand what manual handling is not just about the weight e.g. for example, twisting, jerking or reaching, doing the task too fast, using too much force or lifting the wrong way.		Site personnel
					If mechanical assistance is not reasonable, utilise team lifts.		
5.	SR60 streetheat machine	Operator competency	Incident due to operator	B x 4 = E16	Operator to be suitably trained and their competency verified	D x 4 = M8	BNP representative
			competency		Operator needs to be familiar with the task and the plant.		Site personnel
					Operator must be fit for work.		
6.		Condition of plant	Incident due to plant failure	B x 4 = E16	Operator to conduct preoperational checks on plant.	D x 4 = M8	BNP representative
					Checks to include all fittings, fixtures, gas bottle etc. to be conducted prior to each daily use by the competent operator.		Site personnel
					All gas equipment to have necessary regulators/flash back arrestors in place.		
					Major defects are to be reported to the BNP representative.		
7.		Proximity with personnel	Incident due to close proximity	B x 3 = H12	Establish appropriate exclusion zone around working plant.	D x 3 = M6	BNP representative
					Operators to ensure no others are within 1.5 meters of the operation at any given time.		Site personnel
					Establish spotters as required.		

Item	Job sequence	Potential Hazards	Risk	Risk L x C = R	Control Measures	Residual Risk L x C = R	Responsible Person
8.		Hot works	Fire / burns	B x 3 = H12	Ensure Hot Works permit is completed and authorised before commencing works.	D x 3 = M6	BNP representative
					Operator to wear non-flammable gloves while operating plant.		Site personnel
					In-date Fire Extinguisher to be present within 10 meters of the operation at all times.		
9.	Re-works	Use of plant	vibration	B x 3 = H12	Rake asphalt with rake and throw some new hot mix asphalt fines onto asphalt	D x 3 = M6	BNP representative
					Plate compactor to be operated by a competent person.		Site personnel
					Rotate personnel to reduce exposure to vibration.		
10.	General site	Fuelling Plant	Contact with fuel	B x 3 = H12	Ensure correct fuel is used.	D x 3 = M6	BNP
	hazards		Fire		Ensure spill kit and ABE fire extinguisher is available.		representative Site personnel
					Ensure no naked flames are in the fuelling area		
11.		Noise	Exposure to	C x 4 = H12	Assess work area for excessive noise.	D x 4 = M8	BNP
			excessive noise Hearing Damage		Generally, if there is a need to shout due to production noise, controls need to be implemented.		representative Site personnel
					When deciding control measure, the hierarchy of control must be considered, and the highest reasonably practicable control measure must be used e.g. remove personnel away from the noise rather than PPE.		

Item	Job sequence	Potential Hazards	Risk	Risk L x C = R	Control Measures	Residual Risk L x C = R	Responsible Person
12.		Dust	Inhalation of airborne contaminants	B x 3 = H12	Work activities that produced to be monitored and where possible dust should be controlled by engineering controls such as water suppression or extraction	D x 3 = M6	BNP representative Site personnel
					If dust cannot be controlled that ensure workers are protected by suitable respiratory protection.		
					Ensure other workers are removed from the immediate area.		
13.		Working outdoors	Heat Stress Skin Cancer	B x 3 = H12	Personnel to be aware of the signs and symptom of heat illness and provided advice on how to minimise the risk including • Keep hydrated, about 250ml per 30minutes • Monitor yourself • Check in with your mate • Avoid alcohol and caffeine Signs and symptoms of heat stress include • Pale clammy or hot flushed dry skin • Headaches • Nausea and/or vomiting Personnel to be protected from the risk of sun damage. PPE requirements include sunscreen, brims, sunglasses, longs sleeves and long pants. Personnel to report any symptoms of heat illness to BNP representative immediately. Personnel to receive first aid and medical attention. BNP representative to promote heat illness prevention during daily prestart meeting and toolbox meetings.	D x 3 = M6	BNP representative Site personnel

Item	Job sequence	Potential Hazards	Risk	Risk L x C = R	Control Measures	Residual Risk L x C = R	Responsible Person
14.	Finalise Works	road contact with equipment contact with equipment equipment equipment contact with equipment equipment contact with equipment ensure all equipment is accounted for and packed onto the site vehicles.		D x 3 = M6	BNP representative Traffic Management		
			Inappropriate signage		Liaise with traffic management company before opening work area.		Company
					Traffic Management company to establish normal traffic conditions.		
					BNP representation to conduct a final inspection to ensure		
					No equipment has been missedAll temporary signage has been removed		
					All cover traffic signage has been restored		

Item	Work Activity	What can go wrong	What will be put in place	Responsible Person
